4. Seeds of all plants give us oil. (False)
5. We make paper from plants. (True)

E. Answer the following questions.

1. Name any five vegetables we eat. Mention the part of the plant eaten in each.

Ans: The five vegetables we eat are : potato, carrot, cabbage, cauliflower and broccoli. The parts of the plants are given below:

Potato: stems

Carrot: roots

Cabbage: leaves

Cauliflower and broccoli: flowers

2. What are cereals? How are they different from pulses?

Ans: We eat food grains of some grass-like plants such as rice, wheat, maize, barley and oat. These are known as cereals. Some cereals are ground to make flour (atta).

We also eat grains such as mung and kidney bean (rajma). These food grains are known as pulses. Pulses are found inside pods. Cereals are not found inside pods.

3. What are spices? Give two examples of spices.

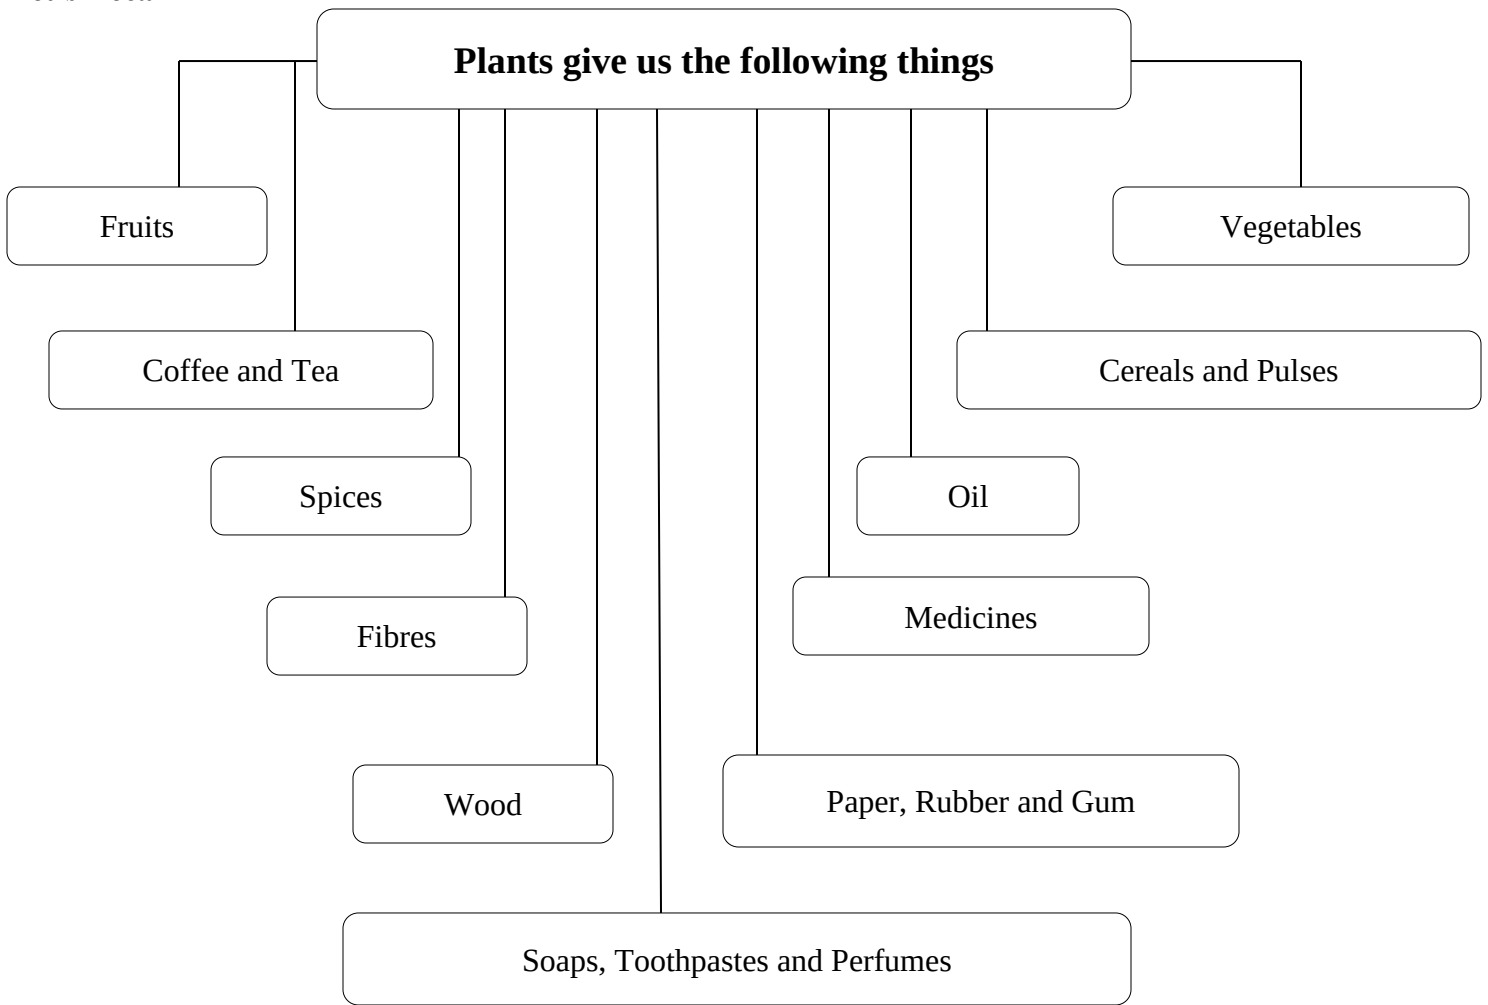

Ans: Spices are usually dried seeds, fruits, roots or barks of plants. Spices add flavour to our food. The two examples of spices are cinnamon and black pepper.

4. What are fibres? Name two plant fibres.

Ans: Fibres are thin thread- like materials which we get from plants. The two plant fibres are cotton and jute.

5. Give two uses of oil.

Ans: The two uses of oil are cooking and oiling our hair.

Lets observe: page no 26 (Practice would be done in the book)

1. Observe the picture and answer the questions that follow.

- Name the plant: Ans. Wheat
- What type of food grain do we get from it? Ans. Cereals
- What do we get when this food grain is ground? Ans. Flour

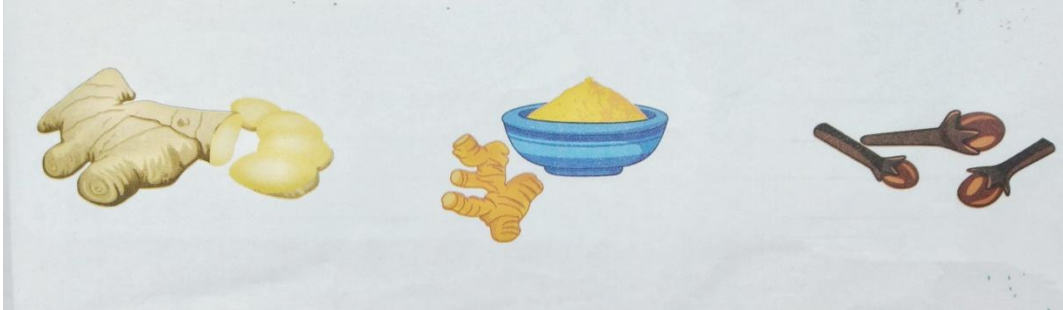

2. In the space given below, draw and colour an object made from wood, which you can find at home.

Students will do it in the book

Lets Apply: page no 27 (Practice would be done in the book)

Shobha has a cough and her mother gives her a drink that contains plant stems and a spice, boiled in it. Can you find out the stems and the spice by looking at the clues below?

- a. This stem is light brown and looks like a root and is also eaten as a vegetable: Ans. Ginger
- b. This stem is yellow in colour and is also used as a spice. Ans. Turmeric
- c. The spice is a small and dark brown seed and is also used to make medicines. Ans. Clove

**Lets analyse and evaluate : page no 28 (Practice would be done in the book)**

1. Which group does this plant belong to (tree, shrub, or herb) and why?
Ans. This plant belongs to shrub because they are small plant with woody stems.
2. Which part of this plant is used to make medicine?
Ans. leaves

The End
